

BOT International

Helping you set up and manage a business driven PMO

BOT International Company Overview

BOT International

Build, Operate, Transfer

Founded in 1999, BOT International helps you build, operate, and transfer PMO-related knowledge, capabilities, and outcomes throughout your organization. We offer productized PMO Content Assets that you can rapidly set up, productized consulting and support that you can use when needed, and worldwide workshops and boot camps where you can participate in highly interactive, effective and enjoyable hands-on learning.

The BOT International Difference

What makes BOT International different is that we provide independent, objective, subject matter expert PMO, PPM, and ITG consultants without an inherent conflict of interest such as supporting the sale of an expensive software product or lengthy billable services engagement.

We seek to give our customers an unprecedented level of confidence that comes from top-tier advocacy that is focused on maximizing value, lowering risk and successfully achieving business results.

We are operational people, not your traditional consultants. We have experience managing IT organizations, PMOs, and business divisions and understand first hand the challenges our customer executives face. We speak your language.

Productized PMO Content Assets

PMO Content Assets are all of the non-application information and subject matter expert (SME) knowledge that ensures the integrity of projects, the effective use of tools, and the successful management of the PMO.

Processes On Demand

BOT International pioneered the PMO Content Asset market. Introduced in 2002 and used worldwide, Processes On Demand provides processes, templates, dashboards, learning resources and supporting PMO information that you can rapidly set up, rebrand, and integrate to your PPM tools and collaboration platforms such as Microsoft Project Server and SharePoint or equivalents.

BOT International helps you build, operate, and transfer PMO-related knowledge, capabilities, and outcomes throughout your organization.

BOT International Service Offerings

BOT International offers customers a wide variety of consulting, training, and support services utilizing BOT International consultants and BOT International partners, experts in their fields, to ensure the successful implementation of Processes On Demand, Project Portfolio Management (PPM), and Information Technology Governance (ITG).

Consulting

Consulting Services are provided by BOT International subject matter expert (SME) consultants in PMO Setup, Project Portfolio Management (PPM), Information Technology Governance (ITG) and Project Closeout and Lessons Learned.

Support On Demand

As your PMO evolves on account of new tools, processes, and ongoing improvement, we can act as your support team on demand to help develop PMO, PPM, and ITG strategy and to maintain the content assets of your PMO.

PMO Workshops and Boot Camps

Attend a PMO workshop or schedule your own boot camp at the BOT International PMO Boot Camp in Orlando, Florida. Visit our website for locations and schedules.
