

Lessons Learned Advisory Services

Helping you set up and manage a business driven PMO

BOT International
Services Overview

Lessons Learned Advisory Services

Headed by Mel Bost, Lessons Learned Practice Lead, BOT International offers Project Closeout and Lessons Learned services designed to give you information, experience and support at each phase of your PMO improvement strategy.

Unbiased, Customer First Advocacy

Unlike consulting organizations or software vendors who have inherent conflicts of interest and who do not make expert resources available without a tie-in to a substantial purchase, our Lessons Learned practice uniquely places your success as our first priority. This gives you an unprecedented level of access to subject matter experts and confidence that comes from a top-tier advocacy that is focused on maximizing your value, lowering your risk and helping you successfully achieve your business results.

PCOLL 010: Project Closeout and Lessons Learned Culture Initiative

Duration: Three to five days, Price: \$7,500 to \$10,000

This initiative is a three to five day on-site intensive examination of current project culture and introduction to effective culture change techniques. The engagement will instill an appreciation for the value of a Project Lessons Learned Culture on a continuous process improvement basis. The engagement heavily draws upon the latest organizational dynamics methods and research to assist groups in developing a “commitment” to a lessons learned culture that will be long-lasting and add value to the PMO or project group.

PCOLL 020: Project Closeout and Lessons Learned Workshop

Duration: Three days, Price: \$7,500

This three-day workshop introduces a Framework to capture, document, and share Project Lessons Learned. This workshop is designed for groups of 20 or less to engage participants in group discussion of issues facing their project organizations in the specific business context. At the end of the workshop, participants will be able to identify Project Lessons Learned candidates and recommend effective continuous process improvements.

PCOLL 030 Project Closeout and Lessons Learned Implementation Engagement

Duration: Five days, Price: \$10,000

This consulting engagement combines the three-day workshop PCOLL 010 with actual consultant hands-on collaboration in a one-to-one setting which addresses the business context of the PMO or project group and the stakeholders of immediate interest to the project groups. This is an intensive consulting engagement and success depends heavily on PMO Management and Company Management leadership and desire to instill a continuous improvement culture based on “actionable” project lessons learned

PCOLL 040: Project Closeout and Lessons Learned Short Course

Duration: One day, Price: \$3,500

This is an intensive one-day workshop that is patterned after the three-day PCOLL 010 Workshop, but leverages the experience of participants as skilled project managers to fully understand the importance and value of project lessons learned from the outset of the course. Participants in this one day workshop will be “selected” by PMO or Company Management/Leadership and the participants will be expected to become “mentors” to other project teams and project support groups as a culture of lessons learned value becomes institutionalized in the organization. Group size will be set by the Instructor and PMO Management.
